Kenmont Primary School

Healthier Packed Lunches for Children

What you need to know

Eating well is important. Children need to eat well as it will give them energy and nutrients to grow and develop, be healthy and active.

A healthy, enjoyable lunch gives children the energy they need to learn and play at school.

Practical Tips for a Healthy Lunchbox

😊 Try to vary the contents of the lunchbox daily. That way you can ensure your child is getting the variety of nutrients their bodies need to function and grow.

😊 Involve your child in preparing their lunchbox. They are more likely to enjoy food they have made themselves.

😊 Wash your hands before handling food. Wash fruit and vegetables before use and put food in clean containers.

😊 Keep different breads in the freezer so you can just take out and defrost what you need for one day’s lunchbox. Using different breads will make the lunchbox more interesting and enjoyable.

😊 If your child refuses to eat brown bread, try a lighter variety or make sandwiches using a slice of white and a slice of wholemeal bread.

😊 For variety, use pitta strips, crackers, bread sticks, or fruit and vegetable finger foods with a dip.

😊 You can use leftovers; for example, rice and curry, vegetable pizza or pasta and sauce.

😊 Make a salad using rice, potato or pasta from the night before, mixed with vegetables, beans and so on.

What is a healthy packed lunch?

Starchy Foods
Base each meal on a starchy food, such as bread, potato, rice, pasta, yam. Starchy foods give energy, fibre, vitamins and minerals.

- Bread, try different types, such as pitta bread, wraps or bread rolls.
- Other starchy foods, such as pasta, couscous or rice.
- Whole grain varieties are best for fibre, which is vital for a healthy digestive system.

Meat and Alternatives
Add some protein, for example meat, fish, eggs, beans or pulses. Protein foods build muscles and provide minerals.

- Lean meats, such as chicken, turkey or ham.
- Cheese, such as cottage cheese, cheddar or soft cheese.
- Egg, such as boiled or quiche.
- Meat alternatives, such as quorn or tofu.
- Dishes containing pulses, beans or meat, for example dahl, houmous or bean salad.

- Meat products such as sausage rolls, sausages and chipolatas, pies and pastries, fried foods should not be included more than once a fortnight.
- Use butter, margarine, mayonnaise or salad dressings sparingly, because these can be high in fat, or use lower fat alternatives.
- The school does not allow nuts in packed lunches.

Milk and Dairy Foods
Include a dairy product or dairy alternative, such as cheese, yoghurt, fromage frais or tzatziki. These foods provide calcium necessary for strong bones and teeth, as well as providing protein and vitamins.

- Lower fat varieties are healthier.

Fruit and Vegetables
Don’t forget to include fruit and vegetables. You can use fresh, frozen, tinned or dried. Fruit and vegetables are full of vitamins, minerals and fibre necessary for the body to function properly and to keep you strong and healthy.

- Add tomato, lettuce, cucumber or sweetcorn to a sandwich.
- A vegetable dish, such as salad.
- Fresh fruit, such as apple, banana, pear or satsumas.
- Dried fruit, such as raisins or apricots.
- Fruit salad (fresh or tinned in juice) or vegetable salad.
- Finger foods, such as cherry tomatoes, carrot or cucumber sticks. Good with a dip, such as houmous or guacamole.

- Use fresh fruit and vegetables, which are in season to help the environment and enjoy variety!
- The school expects all packed lunches to contain at least one piece of fruit, vegetable or salad.

Drinks
Drinks, especially water, help children to concentrate and feel well. Water is freely available in school.

- Another drink can be included in the lunchbox, however please do not include fizzy drinks.
- Replace sugary or fizzy drinks with

Snacks and Confectionery
Snack foods may be included occasionally but aim to make healthier choices. Snack foods tend to be high in fat, sugar and salt. Foods high in fat can cause excessive weight and may lead to heart disease. High sugar foods are high in calories and bad for teeth. High salt foods may increase blood pressure, which can lead to heart disease and some cancers.

For a healthier snack:

- Replace sweets and chocolate with dried fruit, a small bunch of grapes or fruit salad.
- Replace cakes and pastries with fruit bread, malt loaf or fruit bagel.
- Replace salted savoury snacks with rice cakes, breadsticks or plain popcorn.

- Please do not put cakes and pastries, chocolate, biscuits or fizzy drinks in packed lunches.
